

Engine Dsylvia

Cloud Security Architect | CNAPP · Zero Trust · DevSecOps

euginevd@gmail.com | Sydney, Australia | linkedin.com/in/euginevd

Professional Summary

Cloud Security Architect with 18+ years of hands-on experience designing and delivering secure multi-cloud architectures across AWS and Azure in large, regulated environments. Specialises in CNAPP operationalisation, Zero Trust network architecture, and DevSecOps — with a strong track record of building automated, code-first security programs that engineering teams can operate at scale. Current focus includes AI Security Posture Management and cloud-native guardrails uplift across enterprise cloud estates.

Earlier work spans regulated environments in the UAE and Qatar, with experience across enterprise infrastructure, network, and cloud security.

Core Capabilities

Cloud & Platform Security Hybrid/multi-cloud (AWS, Azure); secure landing zones (LZA); CNAPP (CSPM, CWPP, CIEM); Zero Trust & microsegmentation; Kubernetes & container security; network security (NGFW, NDR); edge, API & WAF protection.

DevSecOps & Security Automation Secure CI/CD & GitOps (GitHub Actions, ArgoCD); IaC security (Terraform, Pulumi); Policy-as-Code (OPA, Kyverno); AppSec (SAST, DAST, SCA, image scanning); runtime security (Falco); secrets management.

Identity, Workspace & Endpoint Security Identity governance (Entra ID); PAM, CIEM, ITDR; SASE/SSE (ZTNA, SWG, DLP, CASB); endpoint management (Intune); Defender EDR/XDR; Microsoft 365 security.

Security Architecture, Risk & Governance Threat modelling; risk assessment & control mapping; CIS baseline hardening; data sovereignty & residency; audit readiness (NIST CSF 2.0, ASD ISM/E8/IRAP, SOC 2, SOCI); architecture standards & patterns; senior stakeholder advisory.

Professional Experience

Principal Consultant, Experteq | Sydney, Australia

Feb 2020 - Mar 2026

Security architecture and engineering engagements delivering secure cloud and platform solutions across network, identity, DevSecOps, and governance for regulated enterprises.

Key Client Engagements

Large Australian University – Cyber Transformation Program (Security Architect – Cloud)

- Owned the design and implementation of multi-year Zero Trust network and edge consolidation using AWS LZA and hub-and-spoke architecture across 70+ AWS accounts, securing 300+ web apps and APIs via Cloudflare WAF and AWS Network Firewall.
- Led cloud security posture assessments across AWS, Azure, and SaaS, implementing CNAPP-aligned policy-as-code guardrails across compute, Kubernetes, containers, and serverless aligned to NIST and Cloud Controls Matrix—driving measurable risk reduction.

- Embedded outcome-focused DevSecOps and AppSec controls into CI/CD and GitOps pipelines, integrating IaC security, secrets management, policy-as-code, SAST, SCA, DAST, and container image and runtime scanning to strengthen secure SDLC.
-

National Humanitarian Organisation (Security Architect – Microsoft 365)

- Delivered Microsoft 365 security remediation across Entra ID, Identity Protection, Intune, Defender XDR, Defender for Office 365, DLP and CASB, reducing high-risk findings ~70%.

NSW Government Agency (Security Architect – Network)

- Delivered Citrix NetScaler (ADC) uplift across 20+ VPX/MPX/SDX, including TLS hardening (SSL Labs A+), nFactor/MFA, GSLB, WAF/API security, and Azure App Gateway migrations.

Energy & Utilities Organisation (Security Architect – EUC)

- Assessed endpoint security across SOCI critical-infrastructure IT/OT (air-gapped, privileged workstations), remediating ransomware & privilege-escalation risks per ASD Essential Eight.
-

System Specialist - Enterprise, beIN Media Group | Doha, Qatar

Nov 2015 – Dec 2019

- Led enterprise vulnerability management and penetration testing across IT/OT broadcast environments, remediating ~70% of critical & high-risk findings across production systems.
 - Operated and secured a sovereign private cloud and greenfield data-centre, supporting secure compute, storage, and network platforms with focus on security and data residency.
 - Owned end-to-end EUC security, including endpoint protection, VDI, MDM, and MFA integration across 30+ enterprise applications for secure remote access.
-

Early Career Foundation - Network, Virtualisation & EUC

2008 – 2015

- Advanced from network and application operations into systems integration consulting, architecting infrastructure and virtualisation for UAE government entities across 20+ projects. Developed deep technical expertise in Cisco enterprise routing/switching, large-scale secure Citrix VDI deployments, and multi-site infrastructure orchestration.
-

Education

Master of Information Systems Security – Charles Sturt University, NSW (2016–2017)

Certifications

Cloud & Engineering: AWS DevOps Engineer – Professional | AWS Solutions Architect – Professional | AWS Security Specialty | AWS Advanced Networking Specialty | Azure Solutions Architect Expert | Azure Security Engineer | Microsoft 365 Enterprise Administrator Expert

Security & Architecture: CISSP | CISA | CCISO | TOGAF | PMP

Network & Platform: Cisco CCIE Security | CCNP Security & Data Center | Citrix Certified Expert (Virtualisation, Networking, Security, Cloud) | VMware Certified Expert (Network Virtualisation, Desktop & Mobility)
